Re: Property: 817 S 22nd St

Parsons, KS 67357-4526

Borrower: n/a File No.: 110220

Opinion of Value: \$ 10,000

Effective Date: February 13, 2011

In accordance with your request, I have appraised the above referenced property. The report of that appraisal is attached.

The purpose of the appraisal is to develop an opinion of market value for the property described in this appraisal report, as improved, in unencumbered fee simple title of ownership.

This report is based on a physical analysis of the site and improvements, a locational analysis of the neighborhood and city, and an economic analysis of the market for properties such as the subject. The appraisal was developed and the report was prepared in accordance with the Uniform Standards of Professional Appraisal Practice.

The opinion of value reported above is as of the stated effective date and is contingent upon the certification and limiting conditions attached.

It has been a pleasure to assist you. Please do not hesitate to contact me if I can be of additional service to you.

Sincerely,

Lori Lovelace

• GP Residential : Neighborhood - Description

The subject is located in south Parsons in a neighborhood of older single family residences. Parsons is a town of approx. 11,000 in north Labette county. Employment areas within reasonable commuting distance include Pittsburg, Joplin, MO, Miami OK.

• GP Residential : Neighborhood Market Conditions

Market conditions within the subject market are currently average compared with the last 2 years. Generally employment is stable, the national economy has affected Parsons typically, with increased layoffs and work slowdowns. The real estate market has slowed with an increase in the number of listings and a decrease in the number of sales. Houses are on the market for marketing times longer than the average range. The number of foreclosures have increased, however the number of foreclosure listings is lower than it has been in the past 9 months. Interest rates are currently stable and low, conventional and government insured financing is readily available. Seller concessions of 6-8% are typical.

The subject is below the predominant value of the neighborhood due to the deferred maintenance present as the predominant value is derived primarily from sales of owner-occupied housing in average condition.

• GP Residential : Condition of Improvements

Subject property is similar to other properties in the subject neighborhood. The subject is an older bungalow style house. Interior finish is dated with extensive deferred maintenance. Deferred maintenance includes the following:

- 1. Roof appears to be at the end of it's useful life, there were active leaks at the time of inspection both interior and on the front porch
- 2. Water damaged ceilings
- 3. No heat source-the house is plumbed for natural gas and had a permanently installed space heater which is missing
- 4. Rotted/damaged fascia and soffits around edge of the roof
- 5. Damaged windows, rotted sashes and window sills
- 6. Damaged/missing storm windows and screens
- 7. Carpeting is stained and loose throughout house
- 8. Holes in the walls
- 9. Bath flooring is damaged

Both the garage and the outbuilding are in poor condition. The garage roof is failing and the siding is rotted. The shed has metal siding and roof that is pulled away and the structural pieces of the frame are rotting. Quality of construction is average, condition is fair. There were no utilities on at the time of inspection, the appraiser is making the extraordinary assumption that the plumbing and electrical systems are functional.

• GP Residential : Sales Comparison Analysis - Summary of Sales Comparison Approach

Subject property is compatible with other properties in the subject neighborhood. Sales of properties in Parsons over the last 12 months were surveyed and these three closed sales were determined to be the most comparable to the subject. All sales are within acceptable, market expected proximity of the subject. Parsons is a small town, typical buyers of properties similar to the subject would consider similar properties throughout town.

All value affecting dissimilarities were adjusted according to market reaction. All comparables are older houses similar to the subject. All were bank-owned properties, in this price range with deferred maintenance similar to the subject's, nearly all of the sales are of bank-owned properties as they are the most similar in condition. Comparables 1 & 2 have larger than average sites, similar to the subject. The site value is a higher percentage of the subject's total value than is typical due to the deterioration of the improvements and these comparable sales are similar in that regard. Living area differences were adjusted at \$5/sf.

Secondary market standards for line net and gross adjustments were not met for all comparables. This is typical for foreclosure properties as adjustments for condition can be higher than average. The indicated range of adjusted values brackets the value opinion.

Reconciliation:

The range of adjusted sales prices is: \$9,300-\$14,400. The subject's value could reasonably fall anywhere within this range. Comparable 1 required the fewest adjustments and it had the most similarly sized site. It was given the most weight in developing the opinion of value.

Assumptions, Limiting Conditions & Scope of Work

		LIE MO"	110220
Property Address: 817 S 22nd St	City: Parsons	State: KS	Zip Code: 67357-4526
Client: Ashen Coles/Boat Angel	Address:		

Appraiser: Lori Lovelace Address: 869 Highway 39, Fort Scott, KS 66701-7759

STATEMENT OF ASSUMPTIONS & LIMITING CONDITIONS

- The appraiser will not be responsible for matters of a legal nature that affect either the property being appraised or the title to it. The appraiser assumes that the title is good and marketable and, therefore, will not render any opinions about the title. The property is appraised on the basis of it being under responsible ownership.
- The appraiser may have provided a sketch in the appraisal report to show approximate dimensions of the improvements, and any such sketch is included only to assist the reader of the report in visualizing the property and understanding the appraiser's determination of its size. Unless otherwise indicated, a Land Survey was not performed.
- If so indicated, the appraiser has examined the available flood maps that are provided by the Federal Emergency Management Agency (or other data sources) and has noted in the appraisal report whether the subject site is located in an identified Special Flood Hazard Area. Because the appraiser is not a surveyor, he or she makes no guarantees, express or implied, regarding this determination.
- The appraiser will not give testimony or appear in court because he or she made an appraisal of the property in question, unless specific arrangements to do so have been made beforehand.
- If the cost approach is included in this appraisal, the appraiser has estimated the value of the land in the cost approach at its highest and best use, and the improvements at their contributory value. These separate valuations of the land and improvements must not be used in conjunction with any other appraisal and are invalid if they are so used. Unless otherwise specifically indicated, the cost approach value is not an insurance value, and should not be used as such.
- The appraiser has noted in the appraisal report any adverse conditions (including, but not limited to, needed repairs, depreciation, the presence of hazardous wastes, toxic substances, etc.) observed during the inspection of the subject property, or that he or she became aware of during the normal research involved in performing the appraisal. Unless otherwise stated in the appraisal report, the appraiser has no knowledge of any hidden or unapparent conditions of the property, or adverse environmental conditions (including, but not limited to, the presence of hazardous wastes, toxic substances, etc.) that would make the property more or less valuable, and has assumed that there are no such conditions and makes no guarantees or warranties, express or implied, regarding the condition of the property. The appraiser will not be responsible for any such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist. Because the appraiser is not an expert in the field of environmental hazards, the appraisal report must not be considered as an environmental assessment of the property.
- The appraiser obtained the information, estimates, and opinions that were expressed in the appraisal report from sources that he or she considers to be reliable and believes them to be true and correct. The appraiser does not assume responsibility for the accuracy of such items that were furnished by other parties.
- The appraiser will not disclose the contents of the appraisal report except as provided for in the Uniform Standards of Professional Appraisal Practice, and any applicable federal, state or local laws.
- If this appraisal is indicated as subject to satisfactory completion, repairs, or alterations, the appraiser has based his or her appraisal report and valuation conclusion on the assumption that completion of the improvements will be performed in a workmanlike manner.
- An appraiser's client is the party (or parties) who engage an appraiser in a specific assignment. Any other party acquiring this report from the client does not become a party to the appraiser-client relationship. Any persons receiving this appraisal report because of disclosure requirements applicable to the appraiser's client do not become intended users of this report unless specifically identified by the client at the time of the assignment.
- The appraiser's written consent and approval must be obtained before this appraisal report can be conveyed by anyone to the public, through advertising, public relations, news, sales, or by means of any other media, or by its inclusion in a private or public database.
 An appraisal of real property is not a 'home inspection' and should not be construed as such. As part of the valuation process, the appraiser
- An appraisal of real property is not a 'home inspection' and should not be construed as such. As part of the valuation process, the appraiser performs a non-invasive visual inventory that is not intended to reveal defects or detrimental conditions that are not readily apparent. The presence of such conditions or defects could adversely affect the appraiser's opinion of value. Clients with concerns about such potential negative factors are encouraged to engage the appropriate type of expert to investigate.

The Scope of Work is the type and extent of research and analyses performed in an appraisal assignment that is required to produce credible assignment results, given the nature of the appraisal problem, the specific requirements of the intended user(s) and the intended use of the appraisal report. Reliance upon this report, regardless of how acquired, by any party or for any use, other than those specified in this report by the Appraiser, is prohibited. The Opinion of Value that is the conclusion of this report is credible only within the context of the Scope of Work, Effective Date, the Date of Report, the Intended User(s), the Intended Use, the stated Assumptions and Limiting Conditions, any Hypothetical Conditions and/or Extraordinary Assumptions, and the Type of Value, as defined herein. The appraiser, appraisal firm, and related parties assume no obligation, liability, or accountability, and will not be responsible for any unauthorized use of this report or its conclusions.

Additional Comments (Scope of Work, Extraordinary Assumptions, Hypothetical Conditions, etc.):

APPRAISER'S CERTIFICATION

I certify that, to the best of my knowledge and belief:

- The statements of fact contained in this report are true and correct.
- The credibility of this report, for the stated use by the stated user(s), of the reported analyses, opinions, and conclusions are limited only by the reported assumptions and limiting conditions, and are my personal, impartial, and unbiased professional analyses, opinions, and conclusions.
- I have no present or prospective interest in the property that is the subject of this report and no personal interest with respect to the parties involved.
- I have no bias with respect to the property that is the subject of this report or to the parties involved with this assignment.
- My engagement in this assignment was not contingent upon developing or reporting predetermined results.
- My compensation for completing this assignment is not contingent upon the development or reporting of a predetermined value or direction in value that favors the cause of the client, the amount of the value opinion, the attainment of a stipulated result, or the occurrence of a subsequent event directly related to the intended use of this appraisal.
- My analyses, opinions, and conclusions were developed, and this report has been prepared, in conformity with the Uniform Standards of Professional Appraisal Practice that were in effect at the time this report was prepared.
- I did not base, either partially or completely, my analysis and/or the opinion of value in the appraisal report on the race, color, religion, sex, handicap, familial status, or national origin of either the prospective owners or occupants of the subject property, or of the present owners or occupants of the properties in the vicinity of the subject property.
- Unless otherwise indicated, I have made a personal inspection of the property that is the subject of this report.
- Unless otherwise indicated, no one provided significant real property appraisal assistance to the person(s) signing this certification.

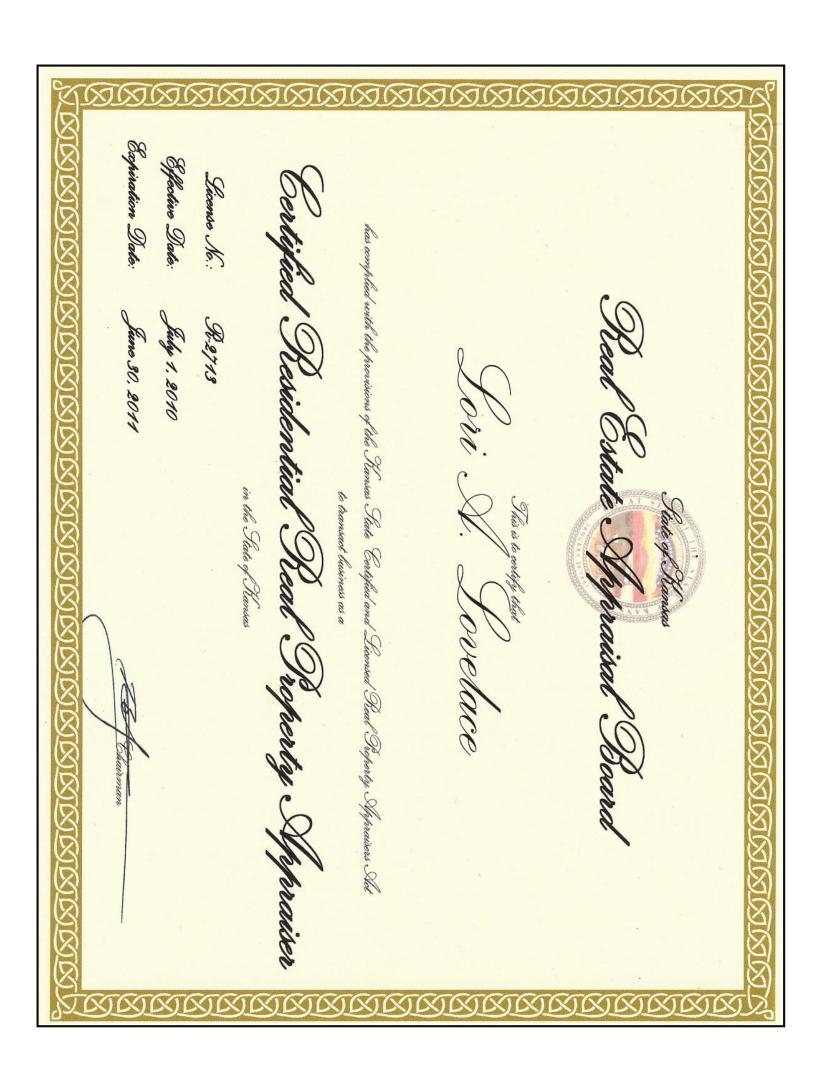

Additional Certifications:

DEFINITION OF MARKET VALUE *:

Market value means the most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller each acting prudently and knowledgeably, and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions

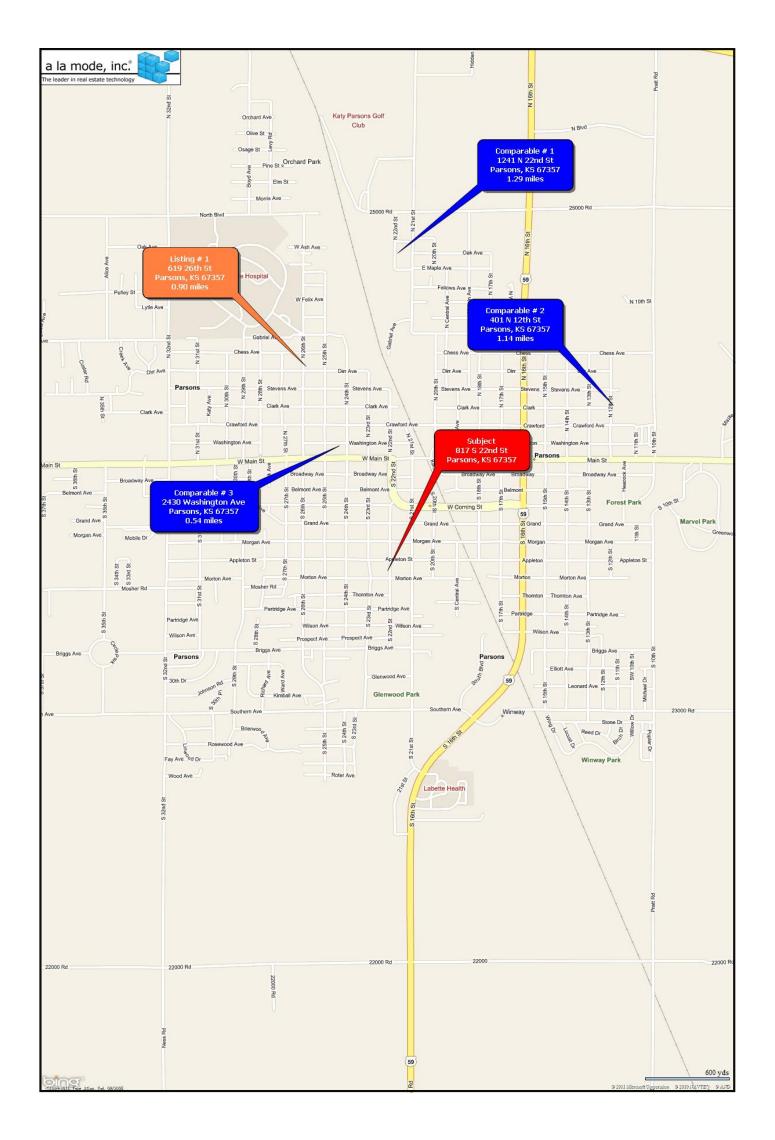

- 1. Buyer and seller are typically motivated;
- 2. Both parties are well informed or well advised and acting in what they consider their own best interests;
- 3. A reasonable time is allowed for exposure in the open market;
- 4. Payment is made in terms of cash in U.S. dollars or in terms of financial arrangements comparable thereto; and
- 5. The price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions granted by anyone associated with the sale.
- This definition is from regulations published by federal regulatory agencies pursuant to Title XI of the Financial Institutions Reform, Recovery, and Enforcement Act (FIRREA) of 1989 between July 5, 1990, and August 24, 1990, by the Federal Reserve System (FRS), National Credit Union Administration (NCUA), Federal Deposit Insurance Corporation (FDIC), the Office of Thrift Supervision (OTS), and the Office of Comptroller of the Currency (OCC). This definition is also referenced in regulations jointly published by the OCC, OTS, FRS, and FDIC on June 7, 1994, and in the Interagency Appraisal and Evaluation Guidelines, dated October 27, 1994.
